

## MACRO MALWARE RESOURCES

In addition to the resources provided in the previous Phishing section, here are some great links for websites when dealing with suspicious Office documents, or any documents for that matter. Please spend some time becoming familiar with them, and bookmarking them for future reference.

- <https://www.virustotal.com/#/home/url>
  - This is the same resource website you were introduced to in the previous module for phishing. If you ever receive a SUSPICIOUS Microsoft Office doc with a prompt inside to "Enable Macros", tell VirusTotal to scan it and tell you if it has malicious macro code Inside
- <https://www.joesecurity.org/joe-sandbox-cloud>
  - Joe Sandbox is a fantastic malware analysis engine. Once you create a free account, you can upload any suspicious files off your system and onto their website for a detailed analysis report (by the way this can also be used if you receive any suspicious attachments in an email, on your file system, on a thumb drive etc
