APPLE RESOURCES:

Here are some great links for websites and settings to configure, to ensure your Apple device are more hardened and secure. Please spend some time becoming familiar with them, and bookmarking them for future reference.

- https://www.obdev.at/products/littlesnitch/index.html
    - A superior firewall for the Apple Mac (they have a free and paid version)

- https://objective-see.com/products.html
    - A fabulous website with many valuable Apple utilities such as Lulu, BlockBlock and Knock Knock! I highly recommend you check out some of these free apps

- https://my.sophos.com/en-us/download/
    - Sophos Antivirus for the Apple Mac is a superior AV solution. Very well worth installing on your Mac computers.
    - And here are the install instructions:
        - https://support.home.sophos.com/hc/en-us/articles/115005339723-Installing-Sophos-Home-on-Mac-computers

- https://www.malwarebytes.com/mac/
    - MalwareBytes is great for catching adware, spyware and other such bad programs that antivirus programs might overlook. It runs **alongside** your AV, as they do not clash with each other. Much needed help!

- https://www.comodo.com/home/internet-security/antivirusfor-mac.php

- Comodo also offers a good free Antivirus program for the Apple Mac

- https://shop.cylance.com/us
  - Cylance's artificial intelligence-driven Antivirus solution is world class, and highly recommended
